

Prajakta Yelgave

Frontend Developer

Pune, Maharashtra | +91 7057318676 | prajaktayelgave@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Frontend Developer with **nearly 2 years of experience building scalable and responsive web applications** using **React.js, JavaScript (ES6+), HTML5, CSS3, and REST APIs**. Experienced in developing **reusable UI components, state management using Redux and Context API, API integration, performance optimization, and Agile software development** practices. Familiar with **TypeScript, Next.js, and Jest unit testing**, with hands-on experience using **Git and GitHub** for version control and collaborative development. **Strong understanding of SaaS application** development, code reviews, **responsive design**, and modern frontend development practices. Passionate about continuous learning, adapting to new technologies, and delivering high-quality software solutions in collaborative team environments.

Technical Skills

Technologies/Libraries : React.js, JavaScript (ES6+), CSS3, HTML5

State Management : Redux, Redux Toolkit, Context API

UI Frameworks: Tailwind CSS, Material UI, Bootstrap, Shadcn

API and Backend Integration: REST APIs, Axios, JSON

Tools & Practices: Git, Jira, Vite, VS code, Performance optimization, Agile collaboration, CI/CD concepts

Learning & Upskilling: Next.js, TypeScript, Jest, React Testing Library, Micro-Frontend concepts, Webpack, Babel

Education

MSc Computer Science | SCMIRT, Pune | 2022 – 2024 | **Grade A**

Professional Experience

Software Developer – React JS | WowvTech (Remote)

Nov 2023 – Nov 2023

- Developed responsive user interfaces using React.js and Material UI.
- Integrated UI components with REST APIs and participated in feature implementation activities.
- Collaborated with cross-functional team members in Agile development processes.
- Participated in debugging, testing, and code review discussions to improve software quality.
- Contributed to UI enhancements and component reusability initiatives.

Junior Software Developer | Movinture India Pvt. Ltd, Pune

Aug 2021 – Sept 2023

- Developed and maintained scalable SaaS-based web applications using React.js, JavaScript (ES6+), Tailwind CSS, and REST APIs.
- Built reusable and modular UI components to improve maintainability and development efficiency.
- Integrated frontend applications with backend REST APIs and handled asynchronous data fetching, loading states, and error handling.
- Collaborated with developers and stakeholders in Agile development environments, participating in sprint planning, daily stand-ups, and feature discussions.
- Participated in peer code reviews to maintain code quality and ensure adherence to development standards.
- Optimized application performance by reducing unnecessary component re-renders and improving rendering efficiency.
- Worked with Git and GitHub for source code management, feature branching, and version control.
- Developed and maintained responsive user interfaces compatible across modern browsers and devices.
- Assisted in debugging, troubleshooting, and resolving production issues during testing and deployment phases.
- Contributed to technical documentation and feature implementation discussions.
- Wrote and maintained basic Jest unit test cases for critical UI components to improve code reliability.

Projects

Portfolio Website

Tech Stack: React.js, Tailwind CSS, Framer Motion, Context API

[Github](#) | [Live Demo](#)

- Built a **fully responsive portfolio** website showcasing projects, skills, and experience using React.js and Tailwind CSS
- Designed **reusable and modular components** with **dark mode functionality** using **Context API**
- Enhanced user experience with **smooth navigation and animations** using **Framer Motion**

E-commerce Shopping Cart Application

Tech Stack: React.js, Redux, Tailwind CSS, Clerk, REST API

[Github](#) | [Live Demo](#)

- Developed a responsive e-commerce application with **product listing** and **category-based filtering** using **REST API for fetching product data**
- **Handled asynchronous API calls with loading and error states** for better user experience
- Implemented **features** including **add-to-cart, wishlist management, and pagination for efficient product browsing**
- Implemented user **authentication using Clerk** and managed **global state using Redux** for cart operations
- Designed **reusable UI components** and **wrote unit test cases with Jest to validate cart operations (add/remove/update)** for consistent product display across multiple pages

Task Manager Application (Ongoing Learning Project)

React.js, TypeScript, Material UI, REST API

- Developing a **responsive task management application using React.js and TypeScript** to strengthen type-safe frontend development skills
- Building **reusable and modular UI components for task creation, editing, deletion, and status management**
- Implementing **TypeScript interfaces** and types to improve code quality, maintainability, and developer experience
- **Integrating REST APIs for task management operations** and handling asynchronous data fetching
- Following **component-based architecture** and responsive design principles for an improved user experience

Learning & Personal Development

- TypeScript for scalable React applications
- Next.js for Server-Side Rendering (SSR) and Static Site Generation (SSG)
- Jest and React Testing Library for unit testing
- CI/CD concepts and modern frontend development practices

Certifications

- Next.js Complete Guide – In Progress (2026)
 - TypeScript for React Developers – In Progress (2026)
 - Jest & React Testing Library – In Progress (2026)
-
